Subject: FW: CSD map still waiting on my getting access to Sam's data
Attachments: Combined Map for CSD ANSI C.pdf

One month later (Sept. '16) I added locations of public water supply wells to the map. I was able to get transmissivity data on a few of the larger community water supply well data like for Nekoosa. Pretty large file size on the attached map, it's a small poster size.

Subject: CSD map still waiting on my getting access to Sam's data

Cheryl, Ryan,

Although a TSR is going through sign off for me to get Sam's data from the computer he was using (Janice Huang told me that UIC Branch needs to approve), I thought I should send you the 'everything' map on CSD that includes everything except Sam's data. That map is attached as I can't print any maps right now as my new computer needs to have drivers installed for the plotters. The attached map is et up as a poster size, do not attempt to send to a printer yourself if you don't have access to a plotter.

Please let me know if you need any other changes in addition to having Sam's well monitoring data added to the map.

Milo
